

Reducing your dependence on Microsoft: a strategic challenge for organizations

Dependence on Microsoft solutions has become a strategic challenge for many organizations. Between **rising costs**, the **risks linked to extraterritorial laws** such as the Cloud Act, and the growing desire to **regain control over their data**, companies and public administrations are now looking for **sovereign alternatives**. The end of support for SharePoint 2016 and 2019 in July 2026 is accelerating this shift. For organizations wishing to move away from Microsoft 365, GoFAST offers a **sovereign collaborative platform** bringing together **DMS, co-editing, workflows, email, chat, videoconferencing, search and AI**. Available as **dedicated SaaS on SecNumCloud-qualified infrastructure** or **On-Premise**, GoFAST **guarantees full control over your data and reduced costs**.

New: GoFAST Protect, your backup plan against Microsoft 365 risks

Global outage, cyberattack, blocked access: when Microsoft 365 goes down, your teams stop too. **GoFAST launches GoFAST Protect**, a **sovereign backup environment (BCP)** fully decoupled from Microsoft, set up and tested before the crisis. DMS, collaborative spaces, directory, workflows, videoconferencing and chat remain available: it's your business activity that keeps running, not just your data. A **concrete answer to Article 21 of NIS 2**, beyond the reach of extraterritorial laws such as the Cloud Act.

GoFAST Mail, the sovereign email solution integrated with your DMS

GoFAST expands its ecosystem with GoFAST Mail, a professional email solution that strengthens the sovereignty of your communications. Based on Open-Xchange, it combines a **modern webmail, shared collaborative calendars, with native integration into GoFAST**: emails, documents and scheduling within a single environment. Deployable in 24 hours, as **dedicated SaaS on SecNumCloud-qualified infrastructure** or **On-Premise**. GoFAST also remains open and interoperable with other sovereign email solutions (BlueMind partnership).

The Police Academy migrates its internal DMS to GoFAST

The Police Academy chose GoFAST to replace its in-house DMS and the portal accessible on law enforcement officers' smartphones. The replaced application had been developed internally some fifteen years earlier. The tool distributes field procedures and training documents more than **25,000 procedures with peaks of several hundred simultaneous users**. The development was carried out **iteratively over 18 months with the Academy's teams**: business-specific record types with dedicated metadata, an advanced search engine, approval workflows, an intranet portal including a smartphone version for Neo2 devices, and a full content migration with the recovery of the 60 existing metadata fields. Everything is **hosted On-Premise in the Ministry of the Interior's datacenter and accessible via the French State Interministerial Network**. This project confirms **GoFAST's ability to meet the most sensitive operational requirements while remaining close to the vendor's standard product**.
