

AIFE (FRENCH MINISTRY OF FINANCE), MANAGES CHORUS (STATE ERP) DOCUMENTATION AND ON GoFAST DMS

COLLABORATION, CO-EDITING, DOCUMENT MANAGEMENT, WORKFLOWS, CSN, MOBILITY

OPEN SOURCE ALTERNATIVE TO ...

Wellcome

Speakers:

Khalid RAIHANE
Projet Manager
@ AIFE

Christopher Potter
Founding President
@ CEO-Vision SAS

AIFE (Agency for Financial Information Technology of the State), in charge of the coherence of the financial IS, manages the system of budgetary, financial and accounting information (Chorus) and proposes dematerialization solutions for the benefit of all governmental and local organisations and companies.

CEO-Vision is the editor of GoFAST Digital Workplace, the symbiosis of the most recognized open source technologies in their field. GoFAST is the sovereign European alternative, OnPremise or SaaS to Office 365 / SharePoint, GoogleDocs ...

GoFAST, innovative and sustainable concept ...

Best of Open-Source in 1 solution: sustainability and reliability, responsiveness of the community...

Administration**

Among the differentiators ...

**Set up in only
24h**

**DMS+
Collaboration**

**Openness and
interoperability**

**All services
Onpremise**

**Secure Access to
Data**

**Quick to take in
hand**

Project Identity Card ...

"Open Source Technology to Meet
Concrete Business Needs"

***Management of CHORUS documentation and associated
processes on GoFAST Collaborative DMS***

More than 70 000
documents
managed

About 400 users :
internal
collaborators and
external service
providers

Advanced
Workflows /
Compliance with
security and
auditability
requirements

Existing before deploying GoFAST ...

File Servers

Potential risks:

- Duplicate files,
- Version errors
- Inflexible management of access rights
- important time to find documents
- No or few audit trails

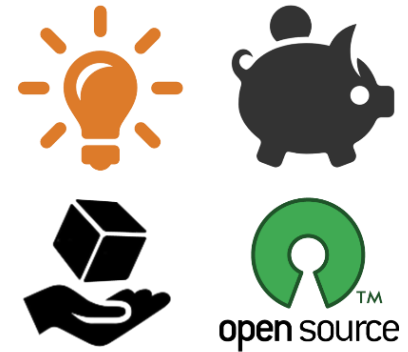

Classic messaging

Potential risks:

- Attachments stored in the e-mail-boxes
- Recipient errors
- Unsecured access to attachments
- Difficulties to follow the exchanges and to respect the processes

The Needs and Imperatives ...

A reliable solution based on Open Source technologies (Alfresco DMS), OnPremise, cost and responsiveness.

- ▶ Speed of implementation and data recovery
- ▶ Advanced workflows to optimize the process of editing, verifying, validating and publishing of documents
- ▶ Powerful search engine and full text
- ▶ Automatic versionning
- ▶ Collaborative features
- ▶ Simple and intuitive ergonomics
- ▶ Data security
- ▶ Traceability of updates and exchanges

Objectives, Challenges and Risks of the project ...

Objectives

- ▶ Centralize documents on a single platform
- ▶ Quickly enable internal teams and service providers to collaborate effectively
- ▶ Facilitate the respect of the business processes related to the management of documentation of Chorus SI

Risks

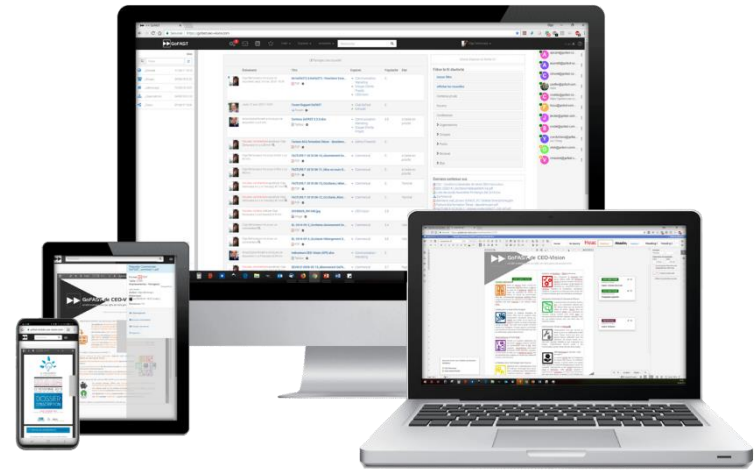

- ▶ User rejection if performance, reliability, and required features are not achieved,
- ▶ Non respect of the very constrained schedule of implementation

Key phases of the project ...

The stages of the project were handled in close cooperation with the teams of AIFE

- ▶ Project framing, study of business processes
- ▶ Migration of documents
- ▶ Modeling and implementation of specific workflows
- ▶ User support in change management (done by AIFE)
- ▶ Deploying GoFAST
- ▶ Continuous improvement approach based on feedback

Results achieved ...

Successful migration:
centralized and highly
secure documents

Respect of workflows
of edition, verification,
validation and
publication of
contents

Facilitating the control
of documentary
quality

Drastic reduction in
the number of emails
exchanged

Save time in
document search
and management
optimization

Documents are
secured with audit
trails
